Week-3 Project Report on “BANK MANAGEMENT SYSTEM”

Problem Statement :

Develop a prototype of a **Banking Information System** in Core Java that provides a working preview of the key functionalities of a real banking system. The prototype should demonstrate the core features and flow of the system, showcasing its functionality and usability.

So I Started working on the selected project . and upto now I completed the **Splash page** and **login page** or **User Registration page** . and it is working really wonderful .

1. Following is the Screenshot of the **flash page** which open at the first as UI .

2. Then the second page is **LOGIN PAGE** . and below is the Screenshot of the Login page .

Welcome To ATM

Card No:

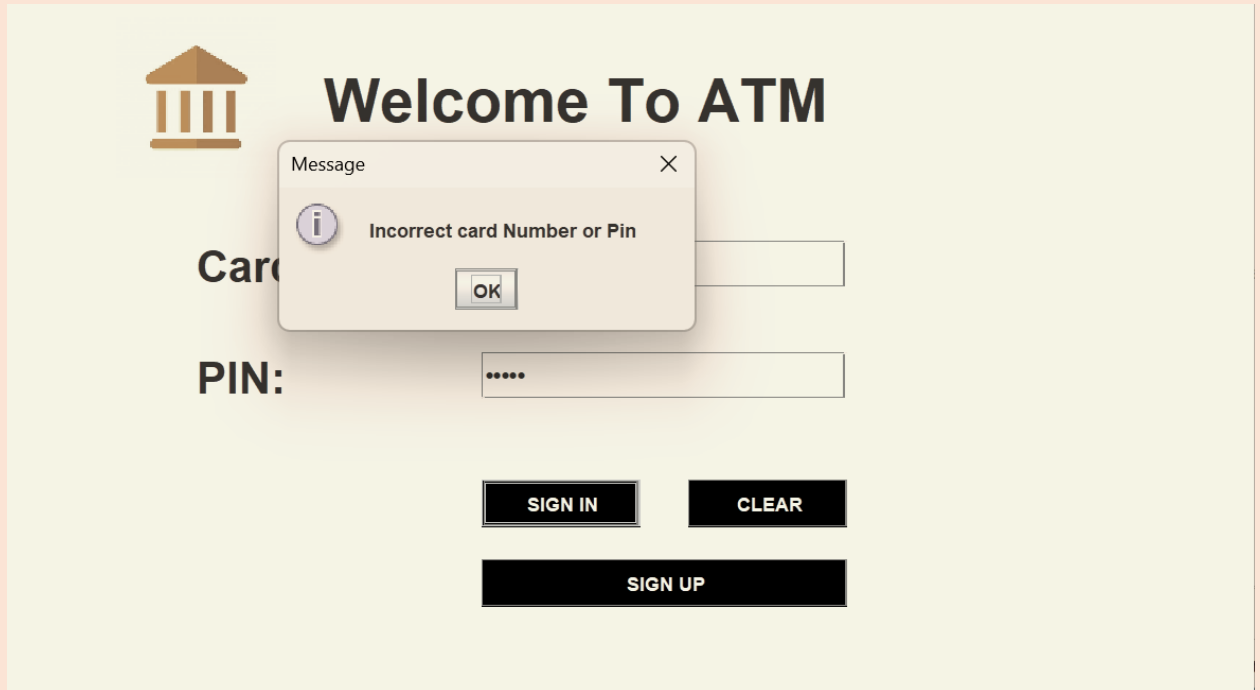

PIN:

SIGN IN

CLEAR

SIGN UP

3. Then the for new user they should have to register otherwise it will show the invalid user as what is shown below .

if You put the wrong password then it will show the message incorrect card number or pin . and if u have the new user then tap the SIGN UP .

4. In the **SIGN UP PAGE** there is three page . and the form number will be created randomly as the sequence .

Following the Screenshot of signup page
